

Summary

Senior game designer and gameplay programmer with 6+ years building and shipping Unity and Unreal experiences across mobile, PC/VR, AI systems, and interactive products. Strong systems-design foundation across combat, progression, economy, retention, onboarding, player motivation, and monetization. Combines creative feature design with hands-on implementation, rapid prototyping, player feedback, data-informed iteration, and cross-functional leadership from concept through live-ready delivery.

Core skills	Game & content design	Systems design, feature design, combat, AI/characters, progression, economy, balance, onboarding, retention, live events
	F2P & engagement	Player motivation, points and tier systems, streaks, leaderboards, monetization, content strategy, UX research, playtesting
	Tools & implementation	Unity, C#, Unreal Engine 4/5, C++, Blueprint, UMG, Behavior Trees, EQS, WebGL, mobile, VR
	Leadership & delivery	Design docs, feature specs, rapid prototyping, stakeholder presentations, agile production, cross-functional leadership, outsourcing coordination

- Experience

Lead Game Designer / Product Lead

City Crafters · Dubai, UAE

Jul 2024 – Jul 2026

 - Owned game and product design across mobile, VR, gamification, playable ads, and branded interactive experiences, turning business goals and player needs into game loops, feature specs, prototypes, progression systems, and production plans.
 - Designed engagement and progression systems including points economies, tier progression, streaks, leaderboards, gamified onboarding, loyalty loops, and short-session competitive experiences; iterated through playtests, usage outcomes, and stakeholder feedback.
 - Directed mobile game concepts including Unseen Blade and Target Destroyed, defining core loops, combat rules, enemy/content structure, feedback systems, difficulty progression, session pacing, and player-facing UX.
 - Built and scaled a cross-functional team from 0 to 12 across design, engineering, art/UI, and QA; introduced clearer specs and sprint workflows that cut feature-delivery time by 35%.

Game Designer

MasterMind GmbH · Germany

Feb 2024 – Jul 2024

 - Directed design and alpha development of a story-driven RPG set in the 13th-century Middle East, leading 2 developers and 3 artists across systems, narrative, content, and player experience.
 - Designed monetization and content strategy across DLC, content packs, and collectibles; supporting campaign reached 1M+ views and grew the community to 40K+ followers.

Senior Game Developer / Lead Game Designer

Nirah Studios AB · Stockholm, Sweden

Aug 2021 – Aug 2023

 - Designed and implemented gameplay systems in Unreal Engine using C++ and Blueprint, including AI behavior, inventory/interactions, climbing, wall-jumping, traversal, and encounter flow.
 - Built AI systems with Behavior Trees and EQS covering pack behavior, needs, aggression, terrain navigation, and encounters, balancing systemic depth with readable player-facing behavior.
 - Managed internal and external contributors on an average \$250K quarterly budget; rapid prototypes and iteration helped secure \$600K+ in investment.

Game Developer

Hyphonics Inc / X on Board · Toronto & Beirut

May 2018 – Aug 2021

 - Solo-built Unity/C# educational and mobile game prototypes end-to-end, covering gameplay loops, UI, audio, level/content spawning, resource systems, and engagement mechanics; demos drove national TV coverage and \$31K+ in grants and investment.

Design focus	Mobile & F2P	Short-session loops, progression, retention, monetization, leaderboard competition, player onboarding, live-event concepts
	Systems	Combat, AI, traversal, inventory, economy, difficulty and pacing
	Process	Design docs, prototyping, playtesting, feedback analysis, iteration, cross-functional implementation

Education

B.S. in Computer Science

American University of Beirut

2024
